

**Champaign-Urbana Mass Transit District  
Environmental and Sustainability Management System (ESMS)**

---

**Environmental Policy**

---

This policy statement describes the Champaign-Urbana Mass Transit District's environmental policy. Each of the District's employees is entrusted with incorporating the actions necessary in their work to fulfill this commitment. CUMTD is committed to implementing and continuously improving environmental management practices and will continue to strive to promote healthier and more sustainable transportation options to the community.

The District empowers each of its employees to fulfill our environmental responsibilities and continually improve our environmental performance by:

- ❖ Striving to continuously improve environmental practices;
- ❖ Meeting and exceeding relevant federal, state, and local regulations, standards, and laws;
- ❖ Maintaining a safe and clean environment by preventing pollution;
- ❖ Empowering each employee and those working on behalf of the District through ongoing training to adhere to this policy;
- ❖ Reaching out to the public to encourage citizen awareness and involvement in promoting environmental stewardship;
- ❖ Minimizing significant environmental impacts identified within the CUMTD's Environmental and Sustainability Management System (ESMS) by setting environmental objectives and continually evaluating progress towards these goals.

CUMTD takes its role in the community as an environmental leader very seriously. The District promotes the creation and implementation of goals and programs that will continuously reduce our environmental impact on the community and environment. This environmental policy will be documented, reviewed on a biennial basis, and communicated to all employees. This policy will also be available to the public via CUMTD's website.
